SUMMARY

I am a final-year MCA student specializing in AI/ML and Backend Development with proven expertise in building RAG-based AI Solutions and responsive web applications. I have hands-on experience with Apache Kafka, NLP pipelines, and the Gemini API. I am seeking a challenging role to leverage my technical skills in a fast-paced software development environment

EXPERIENCE

AI/ML Intern

Tech Mahindra

01/2026 - 03/2026 Chennai, India

A multinational technology company specializing in IT services and solutions

- Designed and deployed RAG-based pipelines using Hugging Face and Gemini API for intelligent chatbot systems
- Processed real-time data streams using Apache Kafka to optimize system performance and scalability
- Applied advanced NLP techniques (tokenization, feature extraction) for institutional data processing
- Improved answer relevance and accuracy through optimized document retrieval and hybrid search architectures

Web Development Intern

Inovera InfoTech

05/2023 - 06/2023 Chennai, India

A company focused on providing tailored IT solutions

- Developed responsive front-end interfaces using HTML5, CSS3, and JavaScript
- Designed the '7 Wonders' project, ensuring cross-browser compatibility and mobile-first responsiveness
- Optimized front-end performance, reducing page load times and enhancing overall user experience

PROJECTS

Campus Assist (AI Chatbot)

Hybrid RAG System implemented using Flask and Gemini API

- Built an intelligent chatbot using Retrieval-Augmented Generation to provide accurate institutional responses
- Utilized vector databases to handle real-time queries with high precision and low latency

Java Banking & Payroll System

A project to manage various banking operations

- Developed a secure backend for banking operations using Inheritance, Polymorphism, and Encapsulation
- Implemented exception handling and modular design to improve system reliability and maintainability
